Work phone:_____ Work phone:_____

List ages of other children in family:_____

Predominant language used at home:_____

G.P./ Paediatrician : _____ Phone_____

How did you find out about us? _____

The healthy function of every cell, tissue & organ in our bodies is dependent upon the integrity of the nervous system. This system consists of the brain, spinal cord and spinal nerves. Protecting these vital structures are the skull and the vertebrae of the spine. Chemical, Physical and Emotional stressors can upset the normal movement of the spinal bones interfering with the flow of information along the spinal nerves and throughout the nervous system. When this occurs it is called a vertebral subluxation. This questionnaire will help reveal the causes of vertebral subluxation which interfere with the optimal function of your nervous system and therefore impair your inborn health and well-being.

Consent for care

Being the parent or legal guardian of this child, I hereby authorize the attending chiropractor at Think Kohi Chiropractic to examine and administer care to my son/daughter named_____ as the examining chiropractor deems necessary.

I understand that I am personally responsible for payment of all fees charged by this office for such care.
